

LOUISIANA HEALTH CARE

REDESIGN COLLABORATIVE

Louisiana Health Care Redesign Collaborative

www.healthcareredesign.dhh.louisiana.gov

The right care . . . for the right patient . . . in the right place - the first time

Vision

***Health care in Louisiana will be patient-centered,
quality-driven, sustainable and accessible to all
citizens.***

***“The right care for the right patient in the right place - the first
time.”***

Collaborative Objectives

- Develop a practical blueprint for an evidence-based, quality driven health care system for the New Orleans region.
- Convert blueprint into a comprehensive system-wide Medicaid Waiver and Medicare Demonstration proposal to HHS for Jefferson, Orleans, Plaquemines, St. Bernard parishes.

www.healthcareredesign.dhh.louisiana.gov

The right care...for the right patient...in the right place - the first time

Waiver

- Focusing initially on public programs – constitutes 51% of all health care dollars spent in Louisiana
 - Currently Medicaid covers over 1 million lives in Louisiana
 - Currently over 850,000 uninsured
 - Currently Medicare covers over 559,000 lives
- Drives improvements across all payer systems

The right care...for the right patient...in the right place - the first time

HHS Expectations

- Plan must match the principles that have been laid out and agreed upon by the Collaborative and HHS.
- A new health care system that:
 - Provides a medical home for every resident.
 - Measures and rewards quality.
 - Emphasizes both individual and provider responsibility.
 - Incorporates emergency preparedness.
 - Utilizes electronic medical records.

HHS Support

- Secretary Leavitt is personally committed to working with Louisiana to develop a “model for the nation”.
- Secretary Leavitt has assigned staff to work directly with the Collaborative.
- Flexibility **within** current funding.

Timeline

- **Collaborative Charter Signed**
 - July 17th
- **Workgroup Interim Reports**
 - August 17th
- **Interim Report for Blueprint Design Presented to DHHS Secretary Michael O. Leavitt**
 - August 23rd
- **Initial Recommendations of Technical Assistance Experts for Financing, Health Information Technology and Medical Home Certification**
 - September 15th
- **Conceptual Design for the Medicaid/Medicare Waiver due to HHS**
 - October 20th

Blueprint Interim Reports

www.healthcareredesign.dhh.louisiana.gov

The right care...for the right patient... in the right place - the first time

Translating the Vision into Reality

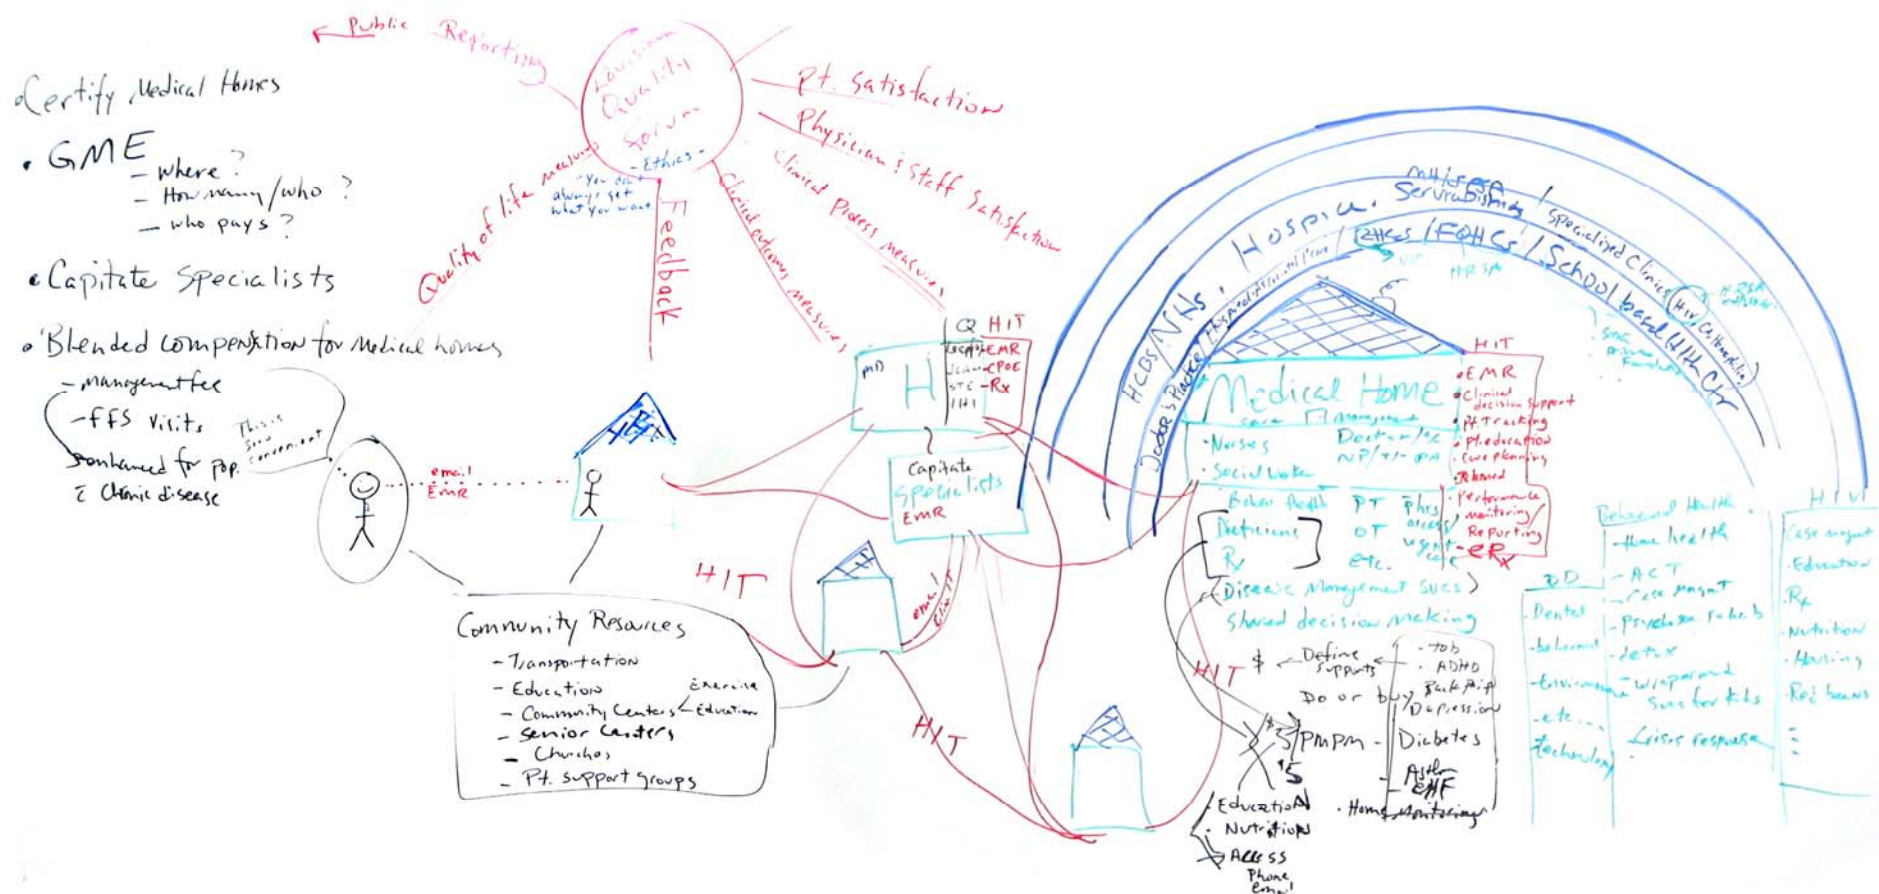

- **Common Themes**

- Single tier of care based on reliable access and quality
- Establishment of an accountable “Medical Home”
- Implementation of health information technology

www.healthcareredesign.dhh.louisiana.gov

The right care...for the right patient...in the right place - the first time

RightCare for Louisiana's Citizens

Translating the Vision into Reality

Transformational Initiatives

- Medical Home - Certification
- Louisiana Quality Forum
- Health Information Technology
- GME and Workforce
- Care coordination for individuals dealing with a terminal illness

www.healthcareredesign.dhh.louisiana.gov

The right care...for the right patient...in the right place - the first time

Translating the Vision into Reality

Establishment of an Accountable Medical Home

- Every citizen has a medical home within their neighborhoods or community, supported appropriately by specialists with access to diagnostic, therapeutic and tertiary care services.
- Every citizen will be provided incentives and/or opportunities that enable them to exercise appropriate patient responsibility.
- Every medical home shall provide:
 - » Preventive and primary care services, including behavioral health
 - » Electronic medical records
 - » Patient Tracking
 - » Patient Education
 - » Care Planning and Coordination
 - » Emergency Preparedness Planning

www.healthcareredesign.dhh.louisiana.gov

The right care...for the right patient...in the right place - the first time

Translating the Vision into Reality

Development and Implementation of a Louisiana Quality Forum

- Every citizen is provided the same level of high quality care through the establishment and monitoring of clinical process and outcome measures, quality of life, patient satisfaction measures, etc.
- Providers are paid extra for providing quality care.
- Performance information is transparent and accessible.

www.healthcareredesign.dhh.louisiana.gov

The right care...for the right patient...in the right place - the first time

Translating the Vision into Reality

Implementation of Health Information Technology

– Health Care Delivery System shall be supported by interoperable Health Information Technology that includes :

- » Electronic Medical Records
- » Computerized Physician Order Entry
- » E-prescribing
- » Telemedicine
- » Tele-monitoring
- » Patient Portals
